

PRESS RELEASE

Enermax presents new designer notebook cooling pad, the Aeolus Premium.

Premium Cooling for Overheated Notebooks

The new cooling pad for notebooks, the Aeolus Premium, is the refined successor of the popular Aeolus. It has been upgraded with additional features and distinguishes itself from ordinary plastic coolers by its distinctly elegant, brushed aluminium design. Aeolus Premium is available in two different versions, black and titanium grey.

Hamburg, 2nd of February 2011. Between older, overloaded notebooks, notebooks with blocked air vents and the many new models that come with more and more performance in progressively slimmer cases, the result is often overheating. Areas on the base can get uncomfortably hot and the integrated fans run noisily at full speed to try and compensate. The new **Aeolus Premium** from Enermax provides an elegant and efficient answer to the problems of notebook cooling. Depending on the personal requirements, the user can seamlessly adjust the fan speed of the cooling pad. As the bottom of the notebook cooler is open, it guarantees a continual fresh air supply.

Perfect in Form and Maximum Comfort

As usual, Enermax focuses on efficient performance as well as on the development of a stylish, high-quality and reliable product: The brushed aluminium finish is available in both black and titanium grey, so the cooling pad can perfectly match the elegance of latest designer notebooks. A ring of 15 blue LEDs gently bathes the laptop providing a cool glow from underneath, and of course if required, the light can be easily switched off. With its slightly tilted angle and the full-size wrist rest, **Aeolus Premium** is designed to give a more comfortable typing experience, even after prolonged use. In addition, the cooling pad is equipped with an additional USB port for keyboards or mouses.

Aeolus Premium can be obtained from next week at a MSRP of £36.90 incl. VAT. It is available in two colours: Black or titanium grey. Technical details and photos: www.enermax.co.uk/aeoluspremium.
